HART'S LAWN GRASS SEEDS

For Better Lawns

5 QUALITY BRANDS—BOXES IN 1, 2 and 5 LBS., ALSO AVAILABLE IN 10, 25, 50 and 100 LB. BAGS.

This is the modern way to buy lawn seed because you can buy a dependable brand with the quality and contents clearly labeled. You'll like the box because it's easier to handle, and protects unused seed better. We offer these 5 quality brands boxed.

HART'S STANDISH PARK (GOLD SEAL) meets the exacting requirements of the State of Connecticut and is fully qualified to bear the State Seal of "Highest Quality." The basic turf grass seeds used are as nearly 100% pure as the most modern cleaning machinery can make them. The lawn resulting from this seed will present an ideal appearance.

HART'S BLUE SEAL bears the "High Quality" Seal of the State of Connecticut, and produces dense, thick turf with a thrifty root system which insures long life and resistance to rough usage. While it does not meet the exacting standards of **Gold Seal**, it produces a turf similar to that fine blend. For best results, sow in Spring or Fall.

HART'S RED SEAL is rated "Good Quality" under State specifications and contains a higher percentage of quick growing grasses than the other Seal Blends, although the permanent grasses are in somewhat smaller supply. Highly valuable for late Spring or Summer seeding. Produces excellent turf under adverse conditions.

HART'S ELM TREE LAWN SEED is named for the famous Wethersfield Elm. The ingredients are similar to those of the State Seal blends but they are not as highly refined. It is rapid growing yet permanent and produces a rich, velvety turf. May be sown at any season, under all conditions.

HART'S SHADY PLACE is a very superior blend of hardy, deep-rooted grasses designed for permanent turf on lawns which have more shade than sun. Will give good results under trees or on the north side of buildings.

We also offer

EVERGREEN. Satisfactory for the average lawn, but simply does not contain as large a percentage of the finer bladed, more desirable grasses, or is the purity quite as high as in the State Seal mixtures.

POOR, or SANDY SOILS BLEND will thrive on soils of that type.

TERRACE SOD is useful on embankments and steep slopes

DEEP SHADE is for use in densely shaded locations only.

SPECIAL BENT AND SPLENDOR (GOLD SEAL) are adapted for spots where an ultra fine turf is desired

SWEET CORN—Early Pearl

We still must include this outstanding Corn in our "Vegetables of Merit."

It is a favorite with our customers from coast to coast, from whom each year we receive numerous letters with glowing reports of this grand quality Corn. A 12-rowed ear,

5 inches long with long, deep, snowy white kernels, just right in size and taste for the high class hotel and restaurant trade. The tender thin pericarp breaks readily to release the delicious tenderness. We urge you to plant a few hills of Early Pearl.

Pkt. 30c., ½ lb. 55c., lb. 95c., 2 lbs. \$1.70

An Outstanding New Corn

Hybrid Sweet Corn—Top Cross Golden Pearl

This remarkably fine new Top Cross of our own introduction is P-39 (Purdue Bantam) crossed onto our popular Early Pearl. The result is a mixture of yellow and white kernels borne on a cob $6\frac{1}{2}$ to 7 inches long, about the maturity period of Golden Bantam, with 12 to 14 rows of the most succulent, delicious Corn you have ever tasted. It inherits all of the excellent qualities of our Early Pearl with the added size and color variation of Purdue Bantam, together with the deeper kernel size of the latter, and all of the vigor, strength and uniformity as well as the high production imparted to all Corns by hybridization. In case you do not like the idea of yellow and white kernels on the same cob, let us assure you that this does not detract from its pleasing appearance on the table, but in fact enhances it. The glistening white of the Early Pearl and the rich yellow of the Purdue Bantam makes about as attractive an appearance as anything we know of. We know you will be more than pleased to have the additional size and yield of this new Top Cross by comparison with the smaller size and production of our Early Pearl. Do not fail to include at least a packet of this for trial in your garden.
